

Genro Backend API Documentation

Bhai Rayaan, Backend ka naam update hokar live ho chuka hai (G capital ke sath). Ye rahi saari APIs ki full links frontend integration ke liye. Sabhi APIs tested aur working hain.

Note: Jin URLs mein : laga hai, jaise :user_id ya :topic_id, wahan frontend se actual ID bhejni hai.

1. 🔑 Authentication APIs (Login & Signup)

A. User Signup

POST

Kaam: Naya account create karne ke liye.

Full URL:

`https://Genro.onrender.com/api/signup`

Body (JSON):

```
{
  "full_name": "User Name",
  "mobile_no": "9876543210",
  "email": "user@example.com",
  "password": "userpassword",
  "class_level": "CLASS 11",
  "board": "CBSE"
}
```

B. User Login

POST

Kaam: App me login karne ke liye (Ye success hone par user ki details aur ID return karega).

Full URL:

`https://Genro.onrender.com/api/auth/login`

Body (JSON):

```
{
  "email": "user@example.com",
  "password": "userpassword"
}
```

2. 📖 Syllabus & Test APIs (Content Dikhana)

C. Get Syllabus

GET

Kaam: User ki class aur subject ke hisaab se chapters aur topics ki list laane ke liye (NCERT sequence me).

Full URL Format:

```
https://Genro.onrender.com/api/syllabus/:class_level/:subject_name
```

Example URL:

```
https://Genro.onrender.com/api/syllabus/CLASS%2011/Physics
```

Note: Space ki jagah %20 aayega chrome me agar samj nhi aa raha to chod do

D. Get Test JSON URL

GET

Kaam: User jab kisi topic ke test pe click kare, toh us test ki JSON file ka URL laane ke liye.

Full URL Format:

```
https://Genro.onrender.com/api/test/:topic_id
```

Example URL:

```
https://Genro.onrender.com/api/test/1
```

(Agar topic ID 1 hai)

3. 📈 User Dashboard & Progress APIs (Performance Track Karna)

E. Get User Dashboard

GET

Kaam: Home screen load hote hi user ka naam, Total XP, aur Streak dikhane ke liye.

Full URL Format:

```
https://Genro.onrender.com/api/user/:user_id/dashboard
```

Example URL:

```
https://Genro.onrender.com/api/user/1/dashboard
```

(Jahan 1 user ki ID hai)

F. Save User Progress

POST

Kaam: Jab user test complete kar le, tab uska result aur XP save karne ke liye. (Backend automatically user ka Total XP badha dega, tumhe alag se XP badhane ki API hit nahi karni).

Full URL Format:

```
https://Genro.onrender.com/api/user/:user_id/progress
```

Example URL:

```
https://Genro.onrender.com/api/user/1/progress
```

Body (JSON):

```
{
  "topic_id": 1,
  "status": "Mastered",
  "accuracy_percentage": 85.5,
  "xp_earned": 50
}
```

4. 🤖 AI Chat APIs (Doubt Solving)

G. Get Chat History

GET

Kaam: Chat screen open hote hi user ki pichli saari AI chats load karne ke liye.

Full URL Format:

```
https://Genro.onrender.com/api/chat/:user_id
```

Example URL:

```
https://Genro.onrender.com/api/chat/1
```

H. Save Chat Message

POST

Kaam: Har naya message database me save karne ke liye. (User aur AI dono ke messages ke liye yahi API chalegi).

Full URL Format:

```
https://Genro.onrender.com/api/chat/:user_id
```

Example URL:

```
https://Genro.onrender.com/api/chat/1
```

Body (JSON):

```
{
  "sender_type": "User",
  "message_text": "Physics ke first chapter me kya hai?"
}
```

Note: Jab AI ka reply aaye, toh usko save karne ke liye sender_type mein "Genro_AI" bhej dena
